SimplePostTool: WARNING: The URL <http://datafireball.com/2014/05/Like%20other> have said, use `FileChannel.transferTo()` or `FileChannel.transferFrom()`. The key advantage here is that the JVM uses the OS's access to DMA (Direct Memory Access), if present. (This is implementation dependent, but modern Sun and IBM versions on general purpose CPUs are good to go.) What happens is the data goes straight to/from disc, to the bus, and then to the destination...by passing any circuit through RAM or the CPU. returned a HTTP result status of 404

SimplePostTool: WARNING: The URL <http://datafireball.com/2014/05/19/study-source-code-episode-3-hadoop-hdfs-server-datanode-blocksenderblockreceiver/Like%20other> have said, use `FileChannel.transferTo()` or `FileChannel.transferFrom()`. The key advantage here is that the JVM uses the OS's access to DMA (Direct Memory Access), if present. (This is implementation dependent, but modern Sun and IBM versions on general purpose CPUs are good to go.) What happens is the data goes straight to/from disc, to the bus, and then to the destination...by passing any circuit through RAM or the CPU. returned a HTTP result status of 404
